Reda El Marzouki, Web Developer

+21269 531 89 09 , relmarzouki@gmail.com, reda-omega.vercel.app/, github.com/Raderne

PROFILE

Experienced web developer with a solid foundation in web design and development. Proficiency in JavaScript, C#, SQL, UI/UX and other programming languages, with proven experience in creating professional websites. Passionate about new technologies, collaborating with teams and continuously improving skills. I'm committed to growing as a developer in order to deliver high-quality, scalable solutions.

ANTÉCÉDENTS PROFESSIONNELS

Apr 2024

Freelance Web Developer, Spirit Pharma France

spirite-pharma-france.vercel.app/

Complete redesign of the Spirit Pharma France website to improve the user interface, performance and overall effectiveness of the site.

- Redesign and development of the Spirit Pharma France website using **Next.js**, **Tailwind CSS,** and **Sanity CMS**.
- Created a modern, responsive design, enhancing user experience and site performance.
- Delivered a high-quality, scalable solution, meeting the customer's specific needs and strengthening their online presence.

INTERNSHIPS

Feb 2024 — Jun 2024

Web Developement and Consultant, Cyber Isparta Youth Center   Isparta

I have participated in the **development** and **consulting** of various web projects. I used my visual design skills and UI/UX knowledge to create dynamic, user-centric web solutions. In addition, I effectively managed databases and used **JavaScript**, **React** and databases (**Firebase**, **MongoDB**) to build efficient and scalable web applications.

- I designed and implemented visually appealing and functional websites that met the specific needs of the organization.
- Provide consulting services to enhance user experience and optimize web solutions for improved performance.
- Collaborate with teams to gather requirements and deliver high-quality, high-impact web projects.

Jul 2024 — Aug 2024

Service technique d'ordinateurs, Barut Technology   Istanbul

As part of Barut Tecjnology's IT technical service team, I was responsible for providing **technical support** and **maintenance** of computer systems and networks. I effectively diagnosed and resolved hardware and software problems, ensuring the smooth running of the organization's technological infrastructure.

- Provide technical support and troubleshooting for computer systems, resolving hardware and software problems quickly and efficiently.
- Install and configure hardware, software and networks to ensure optimal performance and security.
- Worked with the IT team to implement system upgrades.
